VTC54733

Resistant to dust, water and corrosive liquids, the VTC54733 is made with a fully sealed, industrial silicone rubber keypad. Its low-profile keys provide for easy cleaning/disinfecting. For space saving applications, the unit is housed in a thin (.08 inches) and robust, ABS polycarbonate case. It also features an integrated 3-button, HulaPoint™ pointing device (mouse). For low ambient light conditions, the keyboard comes with red LED, backlit keys. The keyboard also boasts 12 function keys, as well as a full-sized number pad. This keyboard is available in PS/2 or single cable USB.
