

eSafe Hellgate Appliance

Enterprise-Level Security for Small and Medium Businesses

With the alarming rise in malware threats, effective content security is becoming more critical each year. Now, small and medium sized businesses can get the security they need with eSafe's unique **"Extreme Capacity. Maximum Security"** capabilities on the new, purpose-built Hellgate appliances, with each device capable of handling content security for hundreds to thousands of users.

eSafe Hellgate appliances make implementing eSafe simple for both smaller organizations, as well as for larger enterprises with multiple sites.

Security and Performance in an Easy-to-use Appliance

Ease of Use

eSafe Hellgate appliances come preconfigured with best-practices security settings, and are customizable as necessary. Initial setup is simplified with a front LCD screen.

Performance and Reliability

eSafe Hellgate appliances are purpose-built, robust and highly reliable content security devices. They include a built-in fail-bypass option, as well as firmware restore and upgrade.

Scalability

A single appliance supports hundreds to thousands of users. A new, patented, inline cluster mode allows connecting multiple appliances for transparent load-balancing.

eSafe Hellgate Appliances: Extreme Capacity. Maximum Security.

eSafe Hellgate appliances provide the comprehensive, enterprise-class content security that organizations worldwide have come to expect from the award-winning eSafe solution:

Extreme Capacity

- eSafe scans content starting at 5 million web pages per hour.
- eSafe is scalable to any size network, with no upper limit.

Maximum Security

- eSafe provides true, deep-web content inspection. It is the only content security solution capable of full HTML inspection of all web pages.
- eSafe catches unknown threats as well, since its inspection process does not rely only on "blacklists" of known threats. This means it goes beyond the usual file signatures and URL lists.

Full Content Management for Security and Productivity

For eSafe, **"Extreme Capacity. Maximum Security™"** is more than a slogan. eSafe Hellgate Gateway and Web appliances include the AppliFilter module featuring hundreds of security and productivity policy enforcement rules to control the usage of P2P, instant messengers, Skype, tunneling, remote control, and more. In addition, the appliances provide the most comprehensive URL filtering database in the world, covering over 60 million web sites in 62 categories.

eSafe Hellgate appliances provide:

- Adaptive content security against the new breed of dynamic threats
- Multi-layer protection from spyware, Trojans, viruses, and worms
- Full addressing of "Layer 8," the new focus of exploits and Web 1.0/2.0 attacks
- The most advanced application and URL filtering for security and productivity
- Email and webmail protection against spam, phishing, and malware
- Blocking of 100% of known threats, and over 95% of new and previously unknown threats

eSafe Hellgate Appliances – Offerings and Sizing

eSafe Hellgate appliances are a perfect solution for small to medium size businesses. Options start from as few as 50 seats, with license packages for 50, 75, 100, 150, 200, 250, 300, 400, and 500 users. Licenses for more users are available upon request.

The appliances include hardware, the relevant add-on modules, and eSafe Care & Support.
