PUSH TECHNOLOGY
WHY WAIT?

M-380

M-SERIES

The Network Box M-380 is a member of the Network Box S-M-E product range, designed to protect medium-sized organizations. It is designed to be 19 inch rack mounted with the included mounting kit. The Network Box M-380 has all of the same capabilities as the rest of the Network Box range. Updates to the systems are performed in real-time using PUSH technology. Whenever a new anti-virus signature, security patch or software update is available, it is pushed out to every Network Box around the world, in an average of less than 45 seconds.
