ExpressPoll®-5000

Electronic Poll Book

The Solution is Surprisingly Simple

ES&S leverages proven and advanced technology to automate a process that was historically consumed time and resources. Our solution manages the voter check-in process and is scalable to meet a wide variety of jurisdiction needs. With more than 15,000 units deployed, ExpressPoll-5000 is the complete, dependable solution.

The lightweight ExpressPoll-5000 stores registered voter information for precincts, districts, or entire jurisdictions. Poll workers enter an identifying piece of information onto the large, easy-to-read touch screen to verify that a voter is registered. The ExpressPoll-5000 is intuitive and easy to use, adding value and convenience to the voting process.

Simplifying Voter Verification

ExpressPoll-5000

The Automated Voter Verification Solution

- Quick access to voter data makes the overall check-in process fast, accurate, and efficient
- Flexible design enables integration with:
  - ES&S' line of touch screen systems
  - ES&S DIMSNeT and PROFILE® voter registration software solution
  - All election system technologies and voter registration systems

The ExpressPoll-5000 includes:

- Audit log file to automatically update voter history on Voter Registration System
- Tablet device with easy-to-read 10.5" touch screen
- Voter access card encoder
- System running on Microsoft® Windows with SQLite database engine
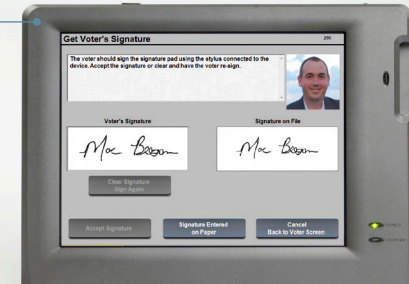

WIDE RANGE OF CAPABILITIES

Print voter verification sheets, display maps and addresses of a voter's polling location, and produce polling place reports

VOTER IDENTIFICATION

Signature pad enables poll workers to compare captured signatures with those stored in the voter registration system and accurately update them as needed

VOTER INFORMATION

Full name, address, precinct, Voter ID number, date of birth, driver's license number, voter status or requirements, and jurisdictions instructions for certain voter situations

Proven Benefits

EMPOWER your poll workers by simplifying the election process

AUTOMATE voter history data upload and reduce human error

LINK voter registration system with the voting system and polling places

REDUCE voter lines at your polling locations

INCREASE accuracy of voter personal information with features like same-day registration and voter edits

ENHANCE voter experience with products that support current check-in process and future trends like early voting and voting centers
