Model 3223 Chassis

The Model 3223 Chassis is a 7x7x6 split-backplane system with three rear AT (DIN 5) keyboard connectors, three independent reset switches behind the front door, three 3.5" media bays, and three disk activity LED's. The 3223 is available in two versions: with an industrial 350-watt, autosensing (115 VAC or 230 VAC) power supply, or with a 350-watt, 48 VDC extended input range (35 - 74 VDC) power supply. When facing the front of the chassis, note that the 6-slot section is on the right (when facing the front of the chassis). The illustration below provides locations of various 3223 components. Procedures for operating and maintaining the 3223 can be found in the *3220 Operator's Manual* and the *3220 Installation and Maintenance Guide*. If you have any questions, please contact our Technical Support Department at 1-800-627-8700 or 1-713-541-8200. Thank you for purchasing this Texas Micro product.
