

Door Openers

180 & 181 Series

- Fits left and right hand doors
- Easy installation
- Rugged, heavy duty construction
- For use in wood and hollow metal jambs

The 180 and 181 Series mortise type door openers are dependable long service devices, providing the security and convenience of remote control door-lock operation. These units are used with cylindrical, bored type locksets and conform to ANSI specifications for steel door frames. The door remains locked until the opener is electrically actuated by a contact device. For AC operation, use with either an 88-50 or 596 Transformer. See pages 11-2 and 11-5. For use in apartments, offices, banks, industrial buildings, schools, and institutions. Use in door interlocking and control systems with timed or manual operation.
