

Variable Cable Prep

Schleuniger

PS-9500 PowerStrip Automatic Cut and Strip Machine

The fully programmable PowerStrip 9500 cuts and strips wires up to 0.55" (14 mm) in diameter with pull-off lengths up to 7.87" (200 mm). Its innovative design enables the processing of many types of applications ranging from standard cable to multi-conductor and flat ribbon cable.

The PowerStrip 9500 is a high-performance, efficient and modular wire and cable processing system that can be fully integrated into an automatic production line.

This powerful cutting and stripping machine impresses with precise and repeatable Schleuniger stripping quality, high processing speed and a vast range of processing possibilities.

The multiple blade system on the cutter head allows the use of up to 3 pairs of blades which can easily handle most cutting, stripping and slitting requirements.

There are various accessories available for the PowerStrip 9500. From basic pre / post processing equipment to high-end solutions for fully integrated inline processing, Schleuniger offers the right match for your production needs.

Schleuniger

OC-3950 OmniCut Automatic Cutting Machine

The OC 3950 is a fast and precise solution for measuring and cutting round wire, cable or tubing as well as flat ribbon cable. Programming and operating parameters are set using the user-friendly front panel. The OC 3950 can be used as a stand-alone cutter or as part of a Schleuniger wire processing system. The many features, options, and accessories make this a perfect fit for a diverse number of cut to length applications.

The OC 3950 can be configured with different blade materials (ex. tool steel [std.] for cutting copper wire or carbide for cutting fiber optic cable with Kevlar), optional length encoder, and an optional RS 232 interface for remote operation.

As a system cutter, the OC 3950 can be fully integrated with many other Schleuniger machines to match your systems needs. Typical system includes: Prefeeder, hot stamp or inkjet marking (non-stop), coiling or stacking, in-line integration with JacketStrip 8300 for automatic cutting, stripping and slitting either round or out-of-round cable.
