

ISD-ES302

Demonstration Board

GENERAL DESCRIPTION

The ISD-ES302 Demonstration Board, a portable unit, enables listeners to evaluate the high voice quality and demonstrate the features available through the SPI control bus of the 33000 series and ISD4000 family products.

Multiple messages can be recorded with the microphone on any of the ChipCorder® products and stored, without power, due to ISD's nonvolatile solution.

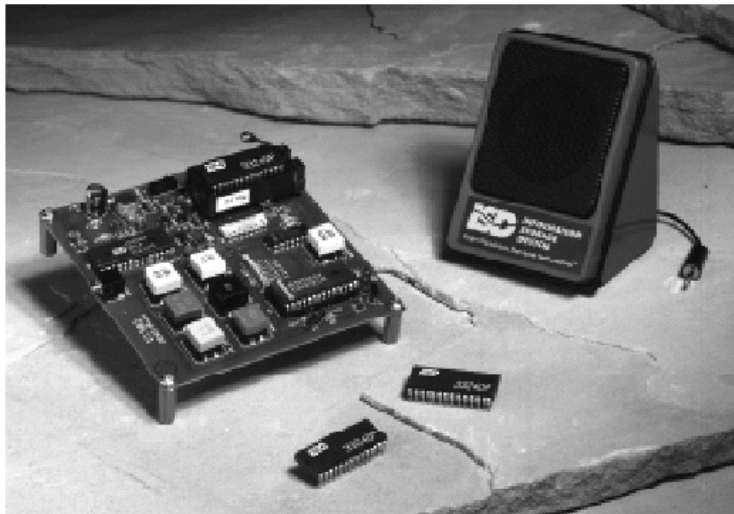

This system is CE certified for use in Europe.

Simple operations is accomplished using the following push buttons:

- On/off switch
- Record button
- Stop button
- Skip to beginning of memory
- Play last message
- Play next message
- Skip to next message

Push-button play and automatic power-down are supported.
