## NLX Half-size Pentium® MMX CPU Card with VGA/LCD, Ethernet & SSD

## Introduction

### The NLX form factor

The PCN-6351/L is Advantech's first NLX form factor half-size CPU Card. The NLX form factor is an alliance-supported mother board standard which supports both PCI and ISA cards. This provides systems with the option to upgrade to PCI bus devices while maintaining previous ISA investment.

The NLX's specification physically separates PCI and ISA buses. This greatly improves system stability and effectively eliminates signal interference from high volume PCI and ISA data transmissions.

### Features

The PCN-6351/L is a powerful CPU card fit for today's industrial environment. With a wide range of features including Pentium MMX and AMD K6-2 CPUs, 512KB L2 cache memory, 36 Bit VGA/LCD, LVDS, 10/100 Base-T LAN, USB interface and one DIMM socket that supports up to a maximum of 128 MB of EDO or SDRAM. The PCN-6351 is also equipped with a watchdog timer, SSD and PC/104 socket which are important for embedded and stand alone applications.

### Complete NLX solutions

Advantech can provide complete system solution for NLX applications. Other Advantech NLX products include the PCA-6106NP3 6-slot backplane with 1 NLX, 3 PCI and 2 ISA slots and the PCA-6104NP2 4-slot backplane with 1 NLX, 2 PCI and 1 ISA slots. Also the IPC-6806 is a series of 6 slot NLX chassis and the IPC-644 is a series of 4 slot NLX chassis.

Additionally, Advantech has adopted the extended dynamic burn-in testing process to produce their 8 layer board design. This creates a stable and consistent supply PCN-6351 boards while maintaining the high standard of quality that is necessary for today's industrial applications.
