

FloorSource Raised Floor Boxes

The Walker FloorSource Series offers the largest selection of raised floor boxes in the industry. The FloorSource Raised Floor Boxes are the pinnacle of functionality, flexibility, accessibility, and capacity when it comes to raised floor box applications. They have many applications, some of which are PBX rooms, MIS processing rooms, IRS regional processing centers, university computer labs, and financial institutions. Walker provides three unique styles of boxes which allow the user a variety of combinations for power and communication. Best of all, FloorSource Raised Floor Boxes are compatible with the Walkerflex® Manufactured Wiring System.

Walker FloorSource Series offer flexibility, accessibility, and capacity.

Features & Benefits

- **Locking tabs help secure box to floor panel.** This allows for quick and easy installation.
- **Units can be prewired for power.** Prewired units reduce labor costs for field installation.
- **Large multi-compartment boxes.** Provides adequate wiring capacity and easily isolates power and communication services.
- **Boxes have several different depth profiles.** These profiles quickly and easily allow the end-user to meet different raised floor depth requirements.
- **Flexible box designs.** Allows the end-user to configure what services they want and need.
- **Activate™ UTP, coaxial, audio, video, and fiber optic inserts.** A wide variety of media interface inserts to insure a reliable, cost effective activation for today's most demanding communication system designs.
- **Meets UL Standard UL514A and Canadian Standard C22.2, No. 18-22, and bears the Listing Mark.**

AF Series Raised Floor Boxes

AF1*

The AF1 Raised Floor Box provides three separate compartments that accommodate a combination of both power and communication devices. This combination is accomplished due to the built-in service dividers. These dividers are arranged in a single-double, single-gang configuration. Polycarbonate hinged lid and trim flange are available for carpet or tile applications, as well as a color choice of black, brown, or gray.

**AF1 box available in a prewired (power) version. Consult your Wiremold sales representative for ordering information.*

Description	Dimension
Overall Trim Ring	8 3/4" x 6 3/4" [222mm x 171mm]
Module Depth Overall	5" [127mm]
Panel Opening	8" x 6" [203mm x 152mm]
Cover Size	7 1/2" x 5" [191mm x 127mm]
Activation Chamber Volume	130 cu in. [2130 cu cm]
User Volume	78.6 cu in. [1288 cu cm]
Total Volume	208.6 cu in. [3418 cu cm]

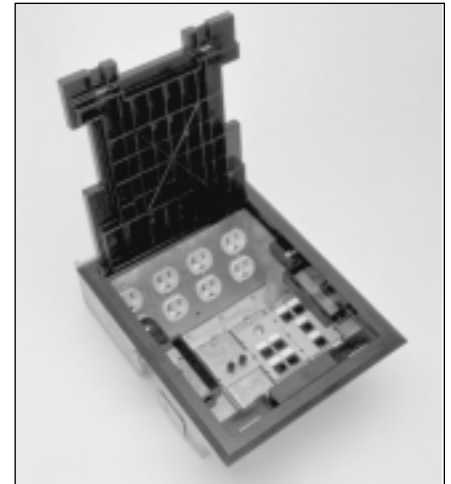

Optional prewired version shown.

AF3*

The AF3 Raised Floor Box provides four separate compartments that accommodate up to eight communications or power devices. The top panel has a unique built-in service divider that accommodates a combination of power and communication. These dividers are arranged in a single-double, single-gang configuration. The lower panel provides single-gang activation points in a single service configuration. Polycarbonate hinged lid and trim flange are available for carpet or tile applications, as well as a color choice of black, brown, or gray.

**AF3 box available in a prewired (power) version. Consult your Wiremold sales representative for ordering information.*

Description	Dimension
Overall Trim Ring	8 3/4" x 10 3/4" [222mm x 273mm]
Module Depth Overall	5" [127mm]
Panel Opening	8" x 10" [203mm x 254mm]
Cover Size	7 1/2" x 9 1/2" [191mm x 242mm]
Activation Chamber Volume	220 cu in. [3604 cu cm]
User Volume	180 cu in. [2948 cu cm]
Total Volume	300 cu in. [4915 cu cm]

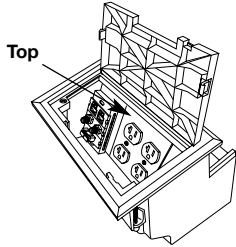

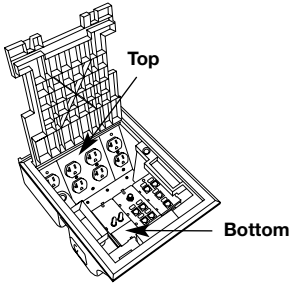

Optional prewired version shown.

Features & Benefits

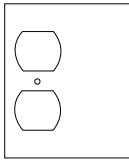

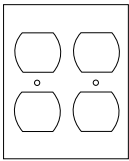

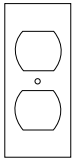

- **Two locking tabs.** Provides secure access assembly to floor panel for ease of installation.
- **Die-cast aluminum bottom housing.** Provides added strength and reliability.
- **Units can be prewired for power.** Prewired units reduce labor costs for field installation.
- **Integral die-cast aluminum flange on bottom housing.** Provides added strength when mounted in raised floor panel.

AC Series Raised Floor Boxes

AC8850 and AC8105

The AC8850 and AC8105 are boxes with a 5" [127mm] depth design, with the AC8105 providing an extra 2" [51mm] of width for additional wiring capacity. These boxes can accommodate four duplex power receptacles on one side. The communication plate will accept at least three communication bezels for up to 18 ports of activation.

Devices shown in photo are not supplied.

Description	AC8850 Dimension	AC8105 Dimension
Overall Trim Ring	9 1/4" x 9 1/4" [235mm x 235mm]	9 1/4" x 11 1/4" [235mm x 286mm]

Interlink Activate™ Connectivity System for the FloorSource Series

- Wide variety of inserts for voice, data, audio, and video.
- Category 5e inserts and keystone jacks exceed ANSI/TIA/EIA568-A-5 Category 5e component performance requirements and utilize universal wiring for both T568A/B.
- Combine up to three 2A inserts within the 6A single-gang opening for true multi-media capabilities.
- Inserts feature a front loading snap-in design for ease of installation, addition, and configuration changes.
- Port labeling can be provided through use of optional icon buttons, labels, and label templates which can be downloaded from www.wiremold.com.
- For use with FloorSource, the Activate inserts snap directly into mini adapter bezels in the AC Series or Activate mounting brackets in the AF Series. Depending on the depth of the box selected, you get three, six, or nine inserts per Activate plate, allowing total flexibility for your data and communication requirements.

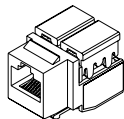

Common Workstation Inserts

Insert With:	2A Size	
	Single Port	Dual Port

RC Series Raised Floor Boxes

Today's offices require new flexibility to accommodate changing technologies. Building designers are looking for ways to lower installation costs. The FloorSource RC Series round flush floor box is the perfect solution.

The RC Series is available in three styles, two of which include a unique slide feature over the receptacle that keeps dirt and dust out of the devices when they are not activated.

The RC Series provides a flush, aesthetically pleasing solution for low-profile installations. It has a standard gray carpet flange that is also available in a black and a forged-brass finish. All styles in the RC Series come pre-assembled for ease of installation.

The RC Series feature a unique slide feature over the receptacle that helps eliminate the accumulation of dirt and dust when not activated.

Features & Benefits

- **Flush profile.** Provides an aesthetic appearance.
- **Round design.** Allows for easy installation, orientation in any direction.
- **Multiple service capability.** Allows single or double duplex receptacles and communications/data service in one unit.
- **Poke-thru style gripper pad.** For easy installation.
