

# FEATURED PRODUCT - SERIES RKW PROGRAMMABLE

**DIN-RAIL MOUNTABLE**

1500W, 600W and 300W RKW Models

The Programmable-Series RKW are industrial-grade single-output power supplies in the 300, 600 and 1500 watt sizes. They provide d-c outputs from 3.3 volts to 48 volts from a-c mains 85-265V a-c with power factor correction (PFC). They are fully enclosed, fan-cooled power supplies. All models feature overvoltage and overcurrent protection and remote error sensing and feature a remote on-off control, remote voltage trimming and master-slave paralleling with a current balance function. The RKW conform to EN60950 following the provisions of the Low Voltage Directive 73/23/EEC and 93/68/EEC for the CE mark. Conducted EMI is suppressed to FCC Class B, VCCI Class B, EN55011-B and EN55022-B. The 300 and 600 watt models meet the radiated noise limits of FCC Class B and EN55022 Class B. The RKW 1500 watt models meet the Class A limits for both conducted and radiated EMI, but can be upgraded to Class B with a noise filter, PN 245-0031. Consult factory for details.

**CE** RKW are CE marked per the Low Voltage Directive (LVD), EN60950.

## FEATURES

- Output indicator, green LED.
- Remote on-off logic control.
- Remote error sensing.
- Parallel operation for redundancy or to increase current.
- Current share circuitry to equalize current.
- Remote voltage programming by resistance.
- Remote voltage programming by voltage.
- Master-slave operation.
- Power fail logic signal.
- Thermal protection.
- Overvoltage protection.
- Overcurrent protection.
- Power factor corrected, wide-range a-c input.
- DIN-Rail mountable. For information, consult factory.

RKW Programmable modules can be individually installed or may be combined into a custom power assembly for multi-output requirements. Please see pages 131-135 for details on Kepco's Power Assembly Program.

## RKW PROGRAMMABLE MODEL TABLE

MODEL	OUTPUT	ADJUSTMENT RANGE	OVP SETTING (1)	OUTPUT CURRENT	CURRENT LIMIT	SHORT CIRCUIT CURRENT	SWITCHING RIPPLE	NOISE	EFFICIENCY (%) TYPICAL	
	Volts		Volts	Amps -10 to +50°C	Amps(2)	Amps	mV p-p	mV p-p(3)	100V a-c	200V a-c
<b>300 WATT MODELS</b>

RKW 48-32K	48	33.6-52.8	52.8-60.0	32	33.6-36.8	45	300	400	84	88

- (1) An overvoltage shuts down the output. Recover by resetting the RC terminals. The overvoltage setting tracks the REF voltage.  
 (2) The current limit is rectangular. If overcurrent persists for more than 30 seconds, the output shuts down. Reset by resetting the RC terminals.  
 (3) Bandwidth 100MHz. Ripple and noise will be approximately 1.5 times these values in the operating temperature range -10-0°C.  
 The ripple and noise values tabulated are valid when the output is derated as shown in figure 1 from 50-65°C.

### PROGRAMMABLE POWER 300-1500 WATTS

The new Kepco RKW Programmable power supplies are more than high-efficiency switch-mode boxes. Beyond their wide-range a-c (or d-c) input, beyond their power factor correction (PFC) to reduce harmonic corruption of the a-c mains, beyond the current-share capacity that allows multi-unit paralleling, the RKW are **fully programmable** by either external voltage (0-5V) or by resistance.

The output will track the programming signal with remarkable fidelity as the traces to the right show. Of course, the RKW have large output capacitors so the time constant will depend upon load – and at very light loads or no load, the discharge response will be slow.

Note particularly the linearity of the RKW power supply's response to square and triangular programming inputs. A 0-5V signal programs the output from 0 to maximum output. A 0-5.5V programming signal will control the RKW to 10% over the rated nominal output.

Output voltage from 0V goes to 52.8V (CH2)  
Rising Time = 8.50 mS

Output voltage from 52.8V goes to 0V (CH2)  
Falling Time = 9.92 mS

## RKW PROGRAMMABLE GENERAL SPECIFICATIONS

SPECIFICATION		RATING/DESCRIPTION	CONDITION
Temperature	Operating	-10 to +50°C	See rating curves, figure 1
	Start up	-20 to -10°C	
	Storage	-30 to +75°C	
Humidity	Operating	10 to 95% RH	Wet bulb temperature <35°C No condensation
	Storage	10 to 95% RH	
Vibration	5-10Hz	10mm amplitude	Sweep time 10 min. 1 hr each axis, not operating
	10-200Hz	2g	
Shock	Acceleration	30g 1/2 sine pulse duration 11 ±5 msec	3 shocks each axis, not operating
Withstand Voltage	Input-Output	a-c 3.0KV 1 min.	Cutout current <sup>(1)</sup>
	Input-Ground	a-c 2.0KV 1 min.	Cutout current <sup>(1)</sup>
	Output-Ground	a-c 500V 1 min.	Cutout current <sup>(1)</sup>
Insulation Resistance	Input-Output	>100MΩ	500V d-c <sup>(2)</sup>
	Input-Ground	>100MΩ	500V d-c <sup>(2)</sup>
	Output-Ground	>100MΩ	500V d-c <sup>(2)</sup>
Safety Standards		UL1950	Certified by UL
		CSA C22.2 No. 950-95	
		EN 60950	Certified by TÜV

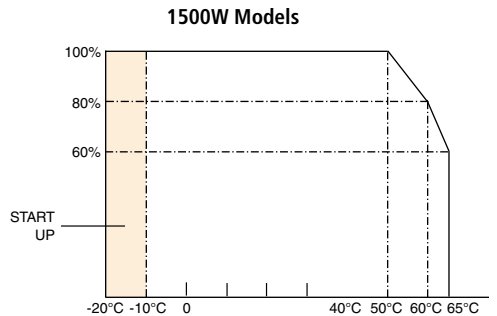

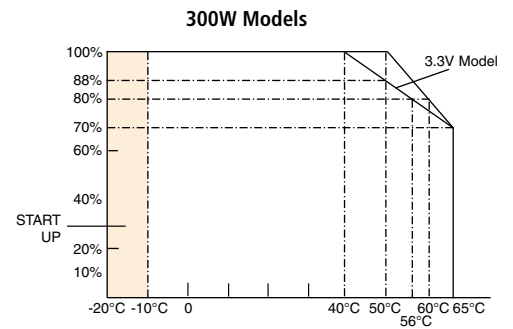

(1) Cutout current: 300 and 600W models = 100mA; 1500W models = 300mA.

(2) Normal temperature (15-35°C) and humidity (10% -85% RH).

## RKW FUNCTIONS

### RKW PROGRAMMABLE COMMON INPUT CHARACTERISTICS

SPECIFICATIONS	RATING/DESCRIPTION	CONDITION
Input Voltage Range	85-265V a-c 110-370V d-c <sup>(2)</sup>	0-100% load, -10 to +50°C
Input Frequency Range	47-66Hz	0-100% load, -10 to +50°C
EMI Conducted Noise <sup>(1)</sup>	FCC Class B, VCCI-Class B EN55011-B, EN55022-B	300-600W models. 1500W models require noise filter: PN 245-0031
	Radiated Noise <sup>(1)</sup>	
Immunity To Electrostatic Discharge (ESD)	EN61000-4-2 Level 4	Normal operation
Radiated Susceptibility	EN61000-4-3 Level 3	Normal operation
Electrical Fast Transient	EN61000-4-4 Level 3	Normal operation
Surge Withstand	EN61000-4-5 Level 4	No damage
Conducted Susceptibility	EN61000-4-6 Level 3	Normal operation
Power Freq Mag Field	EN61000-4-8 Level 4	Normal operation
Voltage Dips, Short Interruptions and Voltage Variations	EN61000-4-11	Normal operation
Input Harmonics	EN61000-3-2	

- (1) The 300 and 600W RKW meet radiated and conducted FCC Class B and EN55022 Class B limits. The RKW 1500W models meet radiated and conducted FCC Class A and EN55022 Class A. The radiated and conducted emissions of the 1500W models are reduced to the Class B level by the use of a noise filter, PN 245-0031. Consult factory.
- (2) Safety agency approval applies only to a-c input operation.

### RKW PROGRAMMABLE MODEL-SPECIFIC INPUT CHARACTERISTICS

SPECIFICATION	CONDITION	300W	600W	1500W
Input Current Amps	100-120V a-c	4.4	8.4	22
	200-240V a-c	2.2	4.2	11
(5V-48V models)				
Input Current Amps	100-120V a-c	3.6	7.2	18
	200-240V a-c	1.8	3.6	9
(3.3V models)				
Surge Current Amps, typ <sup>(1)</sup>	120V a-c	20	30	20
	240V a-c	40	60	40
Fuse Value Amps		10	15	30
Switching Frequency		200KHz	140KHz	140KHz <sup>(2)</sup>
Leakage Current typ (mA)	120V a-c	0.24	0.45	0.5
	240V a-c	0.31	0.6	1.1
Leakage Current max (mA)	120V a-c	0.3	0.75	0.8
	240V a-c	0.38	0.75	1.6
Power Factor	120V a-c	0.99	0.99	0.99
	240V a-c	0.99	0.95	0.95

- (1) First surge only, not including the current flow into the EMI filter.
- (2) Model RKW 3-375K: 100KHz.

## RKW PROGRAMMABLE COMMON OUTPUT CHARACTERISTICS
