

# MODEL 3218P PCI/ISA PASSIVE BACKPLANE RACKMOUNT COMPUTER CHASSIS

DOC #2175

## 7" HIGH INDUSTRIAL RACKMOUNT CHASSIS PROVIDES 6 PCI AND 11 ISA SLOTS

The Model 3218P chassis provides a high throughput PICMG™ compliant passive backplane with six PCI, one CPU, and eleven ISA slots. The combination of the exceptional I/O performance from the PCI local bus (33MHz with a 32-bit datapath and a burst mode of 132MBytes/sec) and the low cost expansion bus make this chassis ideal for high performance data acquisition, telecommunications, and video/graphic applications.

Encased in a painted heavy gauge steel chassis 7"H x 19"W x 22"D, the Model 3218P is designed to withstand elevated operational shock, vibration, and temperature. Power options include a 75,000 hour mean time between failure (MTBF) 300-Watt switchable power supply, or an open frame industrial, 100,000 hour MTBF 350-Watt auto-switching power supply.

## RELIABLE AND SERVICEABLE

The 3218P chassis design allows easy top access to the CPU and controller cards. Front access is provided for one non-removable 3.5" floppy and one 5.25" x 1.63" removable media peripheral. Up to two 3.5" x 1.63" peripherals can be internally mounted. The industrial passive backplane design ensures maximum signal integrity and reduces mean time to repair (MTTR) to as little as 10 minutes.

The Model 3218P chassis is designed and tested to work in environments up to 55°C. Special consideration has been taken to provide optimal cooling for each position in the entire card cage, peripheral bay, and power supply area. Capable of operating under temperature extremes, it features a front accessible washable filter and five 42 CFM fans which provide clean positive pressure cooling throughout the chassis.

Each unit is burned in at 55°C and functionally tested prior to shipment.

## KEY FEATURES

- Six PCI local bus slots provide high performance for use with today's high performance CPUs
- One CPU, eleven ISA, and six PCI slots allow for maximum system flexibility
- Up to two 3.5" x 1.63" internal drive bays; one 3.5" and one 5.25" x 1.63" front accessible bay
- Power options include a 300-Watt switchable or a 350-Watt auto-switching power supply
- Filtered, high performance cooling system with five 42CFM fans and one power supply fan
- Card hold down bracket to keep boards in place during vibration or transportation
- Standard latching door, system locking optional
- One year warranty and complete documentation

Texas Microsystems, an ISO 9001 certified manufacturer, has been designing and manufacturing industrial computers and components since 1975. A founding member of PICMG, they developed the industry's first PC compatible computers using passive backplanes. The company offers a full line of rugged rackmount, benchtop, and mobile computer systems, CPU cards and add-on peripherals; and SPARC telecommunications/internetworking servers. Texas Microsystems' products are manufactured in the USA specifically for industrial automation, computer telephony integration, and other mission critical, high reliability applications.

# MODEL 3218P INDUSTRIAL PCI/ISA COMPUTER CHASSIS

## SPECIFICATIONS

- Physical:**  
 Dimensions - 7" H x 19" W x 22" D  
 178mm H x 483mm W x 559mm D  
 Construction - Heavy-gauge steel, painted  
 Color - Texas Micro Beige, P/N 18831  
 Weight - 40 lbs., typical (18.14 Kg)
- Regulatory:**  
 Safety - UL 1950  
 cUL  
 TUV GS MARK  
 RFI - FCC Certified Class A  
 CE MARK to CISPR 22 Class B
- Power:**  
**300-Watt (switchable)**  
 +5 VDC @ 25.0 Amp  
 +12 VDC @ 14.0 Amp  
 -5 VDC @ 0.5 Amp  
 -12 VDC @ 0.5 Amp  
 Light industrial power supply, MTBF 70,000 hrs  
**Input Voltage -**  
 90 to 132 VAC;  
 180 to 264 VAC, at 47 - 63 Hz
- 350-Watt (auto-switching)**  
 +5 VDC @ 50.0 Amp  
 +12 VDC @ 8.0 Amp (12pk)  
 -5 VDC @ 4.0 Amp  
 -12 VDC @ 2.0 Amp  
 Open frame industrial power supply, MTBF greater than 100,000 hrs  
**Input Voltage -**  
 90 to 264 VAC, at 47 to 63 Hz
- Thermal Cooling:**  
 Five (42 CFM) bus cooling fans and one (26/30 CFM) power supply fan
- Indicators and Controls:**  
 Front Panel - System reset switch  
 (behind Disk drive activity LED latchable door) Power on switch & LED
- Expansion:**  
 Eleven ISA, six PCI, and one dedicated CPU
- Disk Storage:**  
 Internal - Up to two 3.5" x 1.63" hard disks  
 Front Accessible - One 3.5" floppy drive and one 5.25" x 1.63" removable media peripheral device (both behind latched door)
- Keyboard:**  
 Standard 5-pin DIN AT connector on front and rear panels
- Storage Temperature:**  
 -20° to 70°C (-4.0° to 158°F)
- Options:**  
 Tower Stand Kit  
 Key Lock Kit

## ENVIRONMENTAL

Temperature  
 Humidity  
 Shock  
 Vibration  
 Altitude

## OPERATING

0° to 55°C (32° to 131°F)  
 5% to 95%, non-condensing  
 1G @ 10ms duration  
 .25G @ 5 - 100 Hz  
 0 to 15,000 ft. (4,572 meters)

## NON-OPERATING

0° to 70°C (32° to 158°F)  
 5% to 95%, non-condensing  
 10G @ 10ms duration  
 5G @ 5-100 Hz  
 0 to 50,000 ft. (15,240 meters)

## DESCRIPTION

PCI/ISA, 300-Watt (90 - 132 Volt)  
 PCI/ISA International, 300-Watt, (180 - 264 Volt)  
 PCI/ISA Industrial, 350-Watt, (90 - 264 Volt)  
 Tower Stand Kit  
 Key Lock Kit
