

Mitac Advanced Socket 370 PICMG SBC With ATI Rage XL 8MB VGA / LAN

Introduction

The MSC-376 all-in-one full-sized PICMG single board computer is designed to fit a high performance Socket 370 P-II Celeron/P-III Coppermine based processor for high-end computer system application with PCI/ISA bus architecture. It is made to meet today's demanding pace, and keep complete compatibility with hardware and software designed for the IBM PC/AT.

The integrated ATI Rage XL 8MB AGP2x chipset supports CRT displays with up to 1600 x 1200 3D resolution, and refresh rates 85Hz. Four 168-pin DIMM sockets are provided on the card, which can be installed with up to 1GB of memory. It also offers several industrial features such as watchdog timer and on-board Intel 10/100 Base-T networking connection. Two proprietary PCI Interface Bus to connect optional Adaptec Ultra 160 SCSI controller, PCI audio, or additional Intel LAN. The MSC-376 is a highly reliable line of CPU card perfect for IPC applications of computer telephony integration applications.
