

NOTE: See page E34 for Third Party Certification

**FEATURES-SPECIFICATIONS**

**Factory Modifications**

Approvals allow for factory or field modifications on HKB box for drilling and tapping conduit openings on side or back of enclosure without voiding UL-CSA-FM approvals. Internal mounting pad holes on "X" configured boss can be factory added by drilling from inside of box without piercing the bottom of enclosures. Assemblies with CENELEC approvals must be factory modified in order to comply with certifications.

**2HKB Series Boxes**

The wall that separates the instrument side from the power side can be machined for slots or holes up to a maximum of two slots 5/16" by 1-1/2". Submit drawings for machining requirements to Killark.
