NetSight™ Atlas Policy Manager

- Role-based administration models business concepts and IT services in Enterasys' Secure Networks

- Matches the role of the user with available network services

- Provides the first line of defense against attacks at the closest point to the user

- Automated functionality ensures that appropriate services are available to each user, no matter where they log on

- **Role-based enterprise management**
  - Models business concepts and IT services
  - Matches the role of the user with available network services
  - Simplifies and automates the creation and enforcement of user access, network policies and business-enabled networks

- **Secure, reliable connectivity**
  - Works with existing authentication practices
  - Supports 802.1x, RADIUS and MAC authentication
  - Protects user-defined, well-known TCP/UDP ports
  - Facilitates a distributed firewall to all edge points in the network
  - Provides lock-down on all IP addresses belonging to routers

- **Automated capabilities**
  - Deploy policies network-wide with a single click
  - Offers ease of implementation, administration and troubleshooting

- **Complex policy management**
  - Facilitates the creation of complex network policies that include QoS, CoS, rate limiting, VLANs, filtering, etc.
  - Provides an Audit Trail (event log)

Role-Based System Management for the Enterprise

An advanced plug-in application for NetSight Atlas, NetSight Atlas Policy Manager enables simple management of complex network policies, including Quality of Service, Cost of Service, rate limiting, VLANs and filtering.

With NetSight Atlas Policy Manager, the policy rule set can be applied dynamically to the entire network with a single action—to simplify and automate the creation and enforcement of user access, network policies and business-enabled networks.

NetSight Atlas Policy Manager is the key to role-based administration—the modeling of both IT and business concepts inherent in an Enterasys Secure Network. Through role-based administration, a business or organization can be modeled in software by turning technology abstractions into information meaningful to both business and technology personnel.

The NetSight Atlas Policy Manager application defines the "Roles," "Services" and "Rules" of users connecting to the network via Enterasys hardware devices.

NetSight Atlas Policy Manager provides improved configuration wizards so that classification "rules" may be applied to associated devices (switches, RADIUS servers) quickly and easily. At the same time, "services" allow multiple classification rules to be aggregated so that they are applicable to the entire organization—by defining a common language like e-mail, Internet access, or SAP that both technology and business personnel can understand for example. Finally, "roles" or behavioral profiles represent the business functions and departments that exist in a system: executive, sales, engineering, etc.

Implementation of NetSight Atlas Policy Manager requires deployment of NetSight Atlas Console as the central component for infrastructure view synchronization, information sharing and preferences configuration. The advanced plug-in applications provided with NetSight Atlas have been designed for use on Windows NT/2000/XP, Solaris or Linux operating systems. In addition, NetSight Atlas Console can be deployed with HP OpenView on Solaris, providing a complete solution with one of the most popular network management platforms and operating systems on the market.

System Requirements

Solaris OS
Solaris 2.7 & 2.8
Recommended: Ultra 30/60, 900MHz, 1GB RAM
600MB free disk space

Windows 2000, XP, 2003 Server
Recommended: P4, 2.4GHz, 1GB RAM
600MB free disk space

Linux Red Hat 9, Linux Enterprise ES
Recommended: P4, 2.4GHz, 1GB RAM
600MB free disk space

Ordering Information

Product Ordering (select one)

NSA-PM-CD
NetSight Atlas Policy Manager CD (requires NetSight Atlas Console)

NSA-PM-LIC
NetSight Atlas Policy Manager single software license key for use with one copy of the software

NSA-PM-10D
NetSight Atlas Policy Manager limited license key (10-device support)

Required Product

NSA-CD
NetSight Atlas Console CD

NSA-LIC
NetSight Atlas Console single software license key for use with one copy of the software

Additional Plug-In Applications

NSA-IM-CD
NetSight Atlas Inventory Manager CD

NSA-IM-LIC
NetSight Atlas Inventory Manager single software license key for use with one copy of the software

NSA-RSM-CD
NetSight Atlas Router Services Manager CD

NSA-RSM-LIC
NetSight Atlas Router Services Manager single software license key for use with one copy of the software

NSA-RSM-10D
NetSight Atlas Router Services Manager limited license key (10-device support)

Warranty

As a customer-centric company, Enterasys is committed to providing the best possible workmanship and design in our product set. The NetSight product family includes a ninety (90) day warranty that covers defects in media only.

Service and Support

Enterasys understands that superior service and support is a critical component of *Networks that Know*.™ The Enterasys **SupportNet Portfolio**—a suite of innovative and flexible service and support offerings—completes the Enterasys solution. SupportNet offers all the post-implementation support services you need—online, onsite or over the phone—to maintain your network availability and performance.
